Deferred printing

Diagnostic software

Disk error checking utility

DMA channels

DOS commands (within win 2000)

DOS recovery commands

Dot pitch

Dynamic disks

Emergency repair disk (creating, using)

Environmental variables (system level variables, user level variables etc)

Expansion cards

File encryption

Floppy drive controller interface

General troubleshooting

Hard disk drive

- Designations used by the BIOS

- Initialization

- Signature

Hardware resources (viewing)

Horizontal scan frequency

Internet explorer

- Home addresses

- Security zones

Launching DOS within Windows

Legacy devices (installing)

Locating various programs in win 98/2000

Networking:

- Cable types

- Collisions

- Connections (number of computers)

- General networking

- HUB topology

- LAN's

- NIC's

- Peer to peer set up

- Protocol

- Remote user

- TCP/IP

- Unguided media
- Partitions
- Phantom directories
- Plug and play
- Printers (add/remove)
- Processor information
 - Pins on various packages
 - Specifications of various processors
- Program installation
- Protected mode drivers
- RAID (types)
- Registry
 - Control sets
 - General working within the registry
 - Registry editing
 - Top level keys
- Sound Card connections
- Swap files
- Troubleshooting in file system dialog box
- TSR's
- Tweak UI
- USB
 - Data transfer rates
 - Daisy chaining
- User defined settings (win 2000)
- Video memory (calculating required amount)
- Video refresh rates
- Virtual DOS machine
- Virus protection
- Volumes
 - Extended
 - Spanned
- Windows XP
 - Administrative tool
 - Changing control panel layout
 - Compatibility
 - Compressed folders
 - Desk top
 - Dr. Watson's file log
 - Direct X diagnostic
 - Event log
 - Managers
 - Management tools
 - MMC snap-in file extension
 - Performance and maintenance control panel
 - Programs files

- Signature verification utility
- Upgrading
- Windows 2000
 - Boot disk files
 - Control panel
